Some scientific evidence suggests that consumption of antioxidant vitamins may reduce the risk of certain forms of cancer. However, the FDA has determined that this evidence is limited and not conclusive.

Contains no sugar, salt, starch, yeast, gluten, soy, milk, egg, shellfish or preservatives

Made in the U.S.A. www.protocoloflife.com

Manufactured by NHG, P.O. Box 2203, Sparks, NV 89431

Other ingredients: Gelatin (capsule), Stearic Acid (vegetable source) and Magnesium Stearate (vegetable source).

† Daily Value not established.

Supplement Facts			
Serving Size 1 Capsule			
	Amount Per Serving	% Daily Value	
Vitamin C (as Ascorbic Acid)	1.0 g (1,000 mg)	1670%	†
Citrus Bioflavonoids	100 mg		†
(37% total bioflavonoids as Hesperidin)			
Rutin	25 mg		†

120 Capsules

A Dietary Supplement

SUGGESTED USAGE: As a dietary supplement, take one capsule daily, preferably with meals. For intensive use, take 1 capsule 2-3 times daily, or as directed by a health care practitioner.

Vitamin C is a water soluble nutrient well known for its vital role in human immunity. Vitamin C is necessary for the production of collagen (a structural protein in connective tissue) and is therefore important for skin, bone, and joint health. Vitamin C is needed for amino acid metabolism, hormone synthesis, and the utilization of many nutrients, such as folic acid and iron. Vitamin C is also a highly effective antioxidant that can protect the body's cells and molecules from damage by free radicals and reactive oxygen species that can be generated during normal metabolism and environmental pollutants.† In addition, Vitamin C is important for the regeneration of other antioxidants such as Vitamin E.*

CODE P0690 [VS]

Vitamin C is very important to human health. Also known as ascorbic acid, Vitamin C is an essential nutrient found mainly in fruits and vegetables. The body requires Vitamin C to form and maintain bones, blood vessels, and skin.* The human body cannot store Vitamin C, and so the body soon depletes itself if fresh supplies are not consumed daily.

There are many professional advocates of large doses of Vitamin C, including twice Nobel Prize laureate Linus Pauling. Vitamin C is widely recognized for its vital role in human immunity. Vitamin C is necessary for the production of collagen (a structural protein in connective tissue) and is therefore important for skin, bone, and joint health.* Vitamin C is needed for amino acid metabolism, hormone synthesis, and the utilization of many nutrients, such as folic acid and iron.* Vitamin C is also a highly useful antioxidant that can help protect the body's cells and molecules from damage by free radicals, and is important for the restoration of other antioxidants, such as Vitamin E.*

Cautions and Interactions

Oral contraceptives, cyclosporine and aspirin are known to increase the need for Vitamin C. Also, Vitamin C may affect the body's tolerance to nitrate medications.*

Vitamin C may amplify the effects of furosemide, a loop diuretic. In addition, high intake of Vitamin C may increase serum levels of certain medications, such as acetaminophen and tetracycline. There have been rare case reports of Vitamin C interfering with the effectiveness of blood thinning medications, although recent follow up studies do not support this association.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
