Vitamin C is an antioxidant involved in over three hundred metabolic functions in the body, including tissue growth and repair, adrenal gland function, healthy gums, and, most importantly, it supports and promotes a healthy immune system.*

Bioflavonoids act synergistically with vitamin C to support the antioxidant activity that protects structure of capillaries, as well as the collagen-forming activity that maintains healthy capillaries. Adding bioflavonoids promotes the absorption of vitamin C from foods and supplements. **NaturesPlus Super C Complex** has been designed to provide the ultimate Nutritional Support for a healthy immune system.*
