90 Capsules

A Dietary Supplement

SUGGESTED USAGE: As a dietary supplement, take one capsule daily, preferably with meals. For best use, take up to 3 capsules daily, under the supervision of a health care practitioner.

Chromium (also called chromium) is a patented oxygen-coordinated niacin-bound chromium complex that plays an important role in proper insulin action, normal energy production, and blood sugar regulation. It also helps maintain healthy cholesterol levels that are already within the healthy range.* Protected by three U.S. Patents, four international patents and other world-wide patents pending, ChromeMate® is the only niacin-bound chromium supplement with proven biological activity.

Store in a cool, dry place. Please Recycle.

CODE P1415

V2

Chromium is an essential mineral found in very low concentrations in the human body. A biologically active form of chromium participates in glucose metabolism by supporting healthy insulin function. Insulin is a vital hormone responsible for transporting glucose inside cells and maintaining proper blood sugar and blood lipid (cholesterol) levels in the body already within the normal range. Therefore, chromium helps insulin metabolize fat, turn protein into muscle and convert sugar into energy. Recent scientific studies indicate that Chromium can also support healthy vascular smooth muscle response to nitric oxide (NO) and acetylcholine (ACh). NO and acetylcholine are compounds that help healthy blood vessels regulate blood flow in response to physical activity, stress, hormonal signals, and other normal daily rhythms.*

Cautions and Interactions
Animal studies suggest that antacids, particularly those containing calcium carbonate, may reduce the body's ability to absorb chromium.

Chromium supplements may interact with certain diabetes medications such as insulin, metformin, and sulfonylureas. Carefully monitor blood sugar levels if you are concurrently taking chromium with these medications. Medical supervision in these cases is advised.

Corticosteroids may increase the need for chromium.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed best lab requirements.
