CONTAINS NO artificial colors, flavors or preservatives; no wheat, gluten, milk, eggs, peanuts, tree nuts, soy, crustacean shellfish or fish. Suitable for vegans.

Hyaluronic Acid (HA) is produced by fibroblasts in the body (fibroblasts produce collagen) – and the output of HA decreases with age, contributing to aging. HA has amazing moisturizing properties; it is able to hold 1,000 times its weight in water, improving the appearance of the skin.[1] And because it holds water, HA is a lubricating compound and natural cushioning barrier in joints. Hyaluronic acid may also bind to cellular receptors located on the surface membrane of cartilage, where it seems to support a positive immune response in the tissue and helps maintain healthy cartilage.[1] Botanicals like bioflavonoids and ginger naturally provide potent antioxidant compounds to protect skin and joints by removing toxins, promoting circulation, and reduce damage from free radicals, to help maintain youthful vitality.[1]
