Statistical improvements in SF-36 Vitality and Mental Health scores were also observed compared to placebo.

◊◊In a double-blind, randomized, placebo-controlled, cross-over study, 25 subjects exercised on a treadmill two times. On the first occasion, subjects took GNC clinical blend contained in Thermo Inferno 60 minutes before exercise. On the second occasion, they took a placebo. Subjects using GNC clinical blend contained in Thermo Inferno burned three times more calories before, 3% more calories during, and 12 times more calories for up to one hour after exercise compared to using placebo.
