Not for resale on third-party websites, including, but not limited to, Amazon® and eBay®.

PROFESSIONAL USE ONLY

ProbioMax® ENT

DIRECTIONS: As a maintenance dose, after your bedtime oral hygiene routine chew one tablet slowly and completely before swallowing. During periods of increased need, chew up to five tablets per day in divided dose for 90 days, or as directed by your healthcare professional.

Consult your healthcare practitioner prior to use. Individuals taking medication should discuss potential interactions with their healthcare practitioner. Do not use if foil is punctured.

ProbioMax® ENT is a chewable, strawberry-flavored probiotic that activates in the oral cavity for support of ear, nose, and throat health and to naturally promote fresh breath. As you chew, ProbioMax ENT releases the ENT-12™ strain of *Streptococcus salivarius*, a beneficial bacterium that normally occurs in a healthy oral cavity. *S salivarius* adheres to cells in the cavity and positively affects the bacterial population and natural immune defenses therein. Once established, *S salivarius* ENT-12 also naturally counteracts the production of volatile sulfur compounds that can cause bad breath. Tablets are individually sealed in nitrogen-purged aluminum blister packs, which serve as protection from factors proven to compromise the stability of probiotics, such as heat, moisture, and oxygen.*
