FUSI-BCAA® ADVANTAGE: Fusi-BCAA® Lemon ("Fermented Ultra-Soluble Instantized BCAA") contains the world's highest purity, fermented, plant-source BCAAs available on the global market. Unlike conventional BCAAs which are very difficult to mix into beverages, Fusi-BCAA® Lemon is instantized through a proprietary process for superior dissolvability and superior bioavailability.* Clinical research suggests that the 2:1:1 BCAA ratio supports ideal protein synthesis.* The 2:1:1 BCAA ratio of L-Leucine, L-Isoleucine and L-Valine is the precise ratio found in most naturally occurring protein sources.* Fusi-BCAA® Lemon promotes muscular recovery following training, helps with fatigue after periods of exercise, and bolsters stamina during strenuous activities.* Ajinomoto Co., Inc. has been the world's leading producer of amino acids for nearly 100 years and has been producing pharmaceutical grade amino acids since 1956. Our amino acids are trusted for clinical research and used by medical doctors, hospitals, professional and Olympic athletes and professional health care facilities worldwide.

FUSI-BCAA® STACKS UP: Try stacking Fusi-BCAA® Lemon with other AJIPURE® amino acids or other preferred supplements such as protein shakes and various powder preparations for an even more powerful boost.* For an added support to muscular performance and recovery, try stacking Fusi-BCAA® Lemon with Fusile Lemon.*

PURE AND NATURALLY FLAVORED: Fusi-BCAA® Lemon uses real fruit and vegetable blends to offer a delicious combination of natural flavor, natural color and natural sweetness in an easy to use powder. For optimal taste, simply mix one packet of Fusi-BCAA® Lemon powder with cold water and consume completely while beverage is still cold.*

STIR, SHAKE OR BLEND: Fusi-BCAA® Lemon is versatile in order to meet your specific needs. Fusi-BCAA® Lemon may be mixed with cold water by stirring with a spoon, by shaking in a shaker or by blending in a conventional blender.

- **PROMOTES** muscular recovery following physical training*
- **HELPS** with muscle fatigue after periods of exercise*
- **BOLSTERS** stamina during strenuous activities*
- **INSTANTIZED** process to provide increased solubility and improved efficacy*
