Suggested Use: Mix 3 scoops of NitroPro™ in 10-12 ounces of water and/or beverage of choice. Drink 2-3 shakes per day for optimal nitrogen retention and muscle growth.

NitroPro™ Blend of Hydrolyzed Whey Protein Consisting of 75% (Hi-Tech) Peptide-Bound Amino Acids (PBAA's), Egg Whites, Whey Protein Isolate, Milk Protein Isolate, Misolet Casein, and Whey Protein Concentrate, Maltodextrin, Naturally Sweet™ Blend of: Erythritol, Maltitol, Maltodextrin, Xylitol, Tagatose, Sucralose (1.0005g), Vitamin-Mineral Blend, Natural and Artificial Flavor, Xanthan, Inulin, Cellulose, Rhaponticum Carthamoides, FD&C Red #40

NitroPro™ is the fastest, purest, most advanced whey protein we've ever developed. That's because it's made with 65% hydrolyzed whey protein as its primary protein source! By hydrolyzing the protein in this Revolutionary Formula we've created the fastest-acting whey protein yet. Hydrolyzing breaks larger proteins down into smaller pieces that are able to get into your system rapidly, enabling your muscles to start rebuilding immediately. **NitroPro™** also contains 15% of other high-quality proteins for "sustained release". This scientifically-designed ratio of proteins helps ensure maximum blood levels of amino acids-both PBAA's and BCAAs- to grow throughout the entire day. **NitroPro™** is assayed for purity and potency and is only made from the highest quality material available.

HI-TECH PHARMACEUTICALS

FRESH STRAWBERRY MILKSHAKE - FLAVOR

DIETARY SUPPLEMENT

NITROPRO™

- NET NITROGEN UTILIZATION (NNU) OF 6 TIMES THAT OF ORDINARY WHEY!
- CONTAINS 75% PEPTIDE-BOUND AMINO ACIDS (PBAA'S), WHICH ELEVATE NITROGEN RETENTION BY 16X, COMPARED TO FREE-FORM AMINO ACIDS!
- REDUCES PROTEIN MOLECULES FROM 20,000 DALTONS TO 400-1,000 DALTONS- DRASTICALLY IMPROVING ABSORBABILITY!
- POSSESSES AN/TN RATIO 500% GREATER THAN OTHER PROTEIN- EVISCERATING THE COMPETITION!
- INCREASES PROTEIN SYNTHESIS BY 190% WITH 98% PURE RHAPONTICUM CARTHAMOIDES FROM RUSSIA!

60G PROTEIN 45G PBAA'S 250MG RHAPONTICUM 20G BCAAS

SCIENTIFICALLY-FORMULATED PROTEIN MAKES ALL OTHER PROTEINS OBSOLETE! TRY NITROPRO™ AND "GET BACK" FROM YOUR PROTEIN WHAT YOU "PUT INTO" YOUR TRAINING!

17SERVINGS

NitroPro™ was specifically developed for serious athletes and bodybuilders. **NitroPro™** is the first protein supplement to focus entirely on protein absorption, protein utilization-and ultimately, protein synthesis.† Nitro = Nitrogen balance... Pro = Protein Synthesis. **NitroPro™** is the first scientifically based protein ever developed. **NitroPro™** is Hi-Tech protein, literally! **NitroPro™** is crucial to the body's ability to build quality muscle tissue and strength.† **NitroPro™** is based upon 6 crucial protein technologies:

- 1) An increased Net Nitrogen Utilization (NNU) from the protein we ingest. NNU refers to protein synthesis and anabolism from protein. **NitroPro™** has a NNU of 6X normal whey.†
- 2) Consists of 75% Peptide-Bound Amino Acids (PBAA's), which are absorbed more quickly and increase nitrogen retention by 16x compared to free-form amino acids!†
- 3) Partial hydrolysis of protein with a proprietary process where systematically reduced protein molecules are abated from 20,000 Daltons in size to 400-1,000 Daltons.†
- 4) Sustained Release times 2... The dual approach in **NitroPro™** includes wet-milling ion exchanged whey protein for up to a 12-hour release profile- coupled with micellar casein that releases over 7 hours.†
- 5) Possesses an AN/TN ratio 500% greater than other protein products, which causes **NitroPro™** to eviscerate the competition!†
- 6) Utilizes 98% pure Rhaponticum Carthamoid extract, which increases protein synthesis by 190%.†

NitroPro™ also contains vital nutrients that are crucial to the body's ability to build and retain muscle. **NitroPro™** provides a perfect 3 to 1 protein to carbohydrate ratio, which includes 60 grams of primarily partially hydrolyzed whey protein, agglomerated egg albumen, and calcium caseinate for texture and taste. **NitroPro™** also provides 20 grams of complex carbohydrates to help ensure the body will conserve protein for building muscle tissue and not consume the protein as an energy source.† **NitroPro™** also contains the vitamins and minerals necessary to speed up the process of converting protein into muscle mass. These nutrients are essential in the conversion of food into energy, tissue growth and repair, and most importantly, building lean body mass. **NitroPro™** makes up a total protein and nutrient package that will provide you with unquestionable gains in muscle growth and strength. Try **NitroPro™** and "Get Back" from your protein what you "Put Into" your training!
