RECOMMENDED USE: Take one lozenge, one to eight times daily. Allow tablet to dissolve under tongue or allow to dissolve in the mouth before swallowing.

Dicobalene-V™ is a revolutionary B-Complex Vitamin unlike any other product on the market. Dicobalene-V™ is active immediately upon absorption, while most B-12 products must be converted to methylcobalamin by the body before it can be used. Methylcobalamin and Adenosylcobalamin are the two active coenzymated forms of B-12 active in the central nervous system. Dicobalene-V™ unique formula of B-12, B-6, Folic Acid and Biotin, when placed under the tongue are absorbed directly into the bloodstream, providing nutritional support for the central nervous system and cardiovascular function. Dicobalene-V™ is an excellent product to increase energy without the use of stimulants.

WARNING: B-12 and its coenzymes are extremely heat and light sensitive, and will lose its potency when subjected to those elements. Dicobalene-V™ utilizes a very unique Beta-Cyclodextrin delivery system in its tablets to ensure full potency. Dicobalene-V™ is manufactured in a highly controlled environment, making it the most potent form of Vitamin B-12 in America.
