Contains no salt, yeast, wheat, gluten, soy, milk, egg, shellfish or preservatives.

Made in the U.S.A. www.protocolforlife.com

Manufactured by NHG, P.O. Box 2203, Sparks, NV 89431

Other Ingredients: Gelatin (capsule), Stearic Acid (vegetable source), Magnesium Stearate (vegetable source), Silica and Rice Flour.

(\*) Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established.

D-Mannose is a simple sugar that occurs naturally in some plants, including aloe vera. Although small amounts of D-Mannose are made by the human body, much of it is rapidly excreted in the urine.

D-Mannose supplementation encourages foreign particles to bind to it rather than the lining of the urinary tract. It works in this way: In the bladder, D-Mannose "sticks" to undesirable particles, preventing them from attaching to the lining of the bladder. These particles can thereby be flushed away during urination, making it more difficult for them to stay inside the urinary tract.\*

D-Mannose is safe and natural, and since it isn't metabolized in the body, it doesn't interfere with blood sugar regulation or create an imbalance in the normal body gut flora (microorganisms that normally live in the digestive tract).\*

**Cautions and Interactions**  
There are no known drug interactions.

**Guaranteed Quality**  
This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.

**90 Capsules**

A Dietary Supplement

**SUGGESTED USAGE:** As a dietary supplement, take 3 capsules 2-3 times daily.

D-Mannose is a simple sugar that occurs naturally in some plants, including cranberries. Although small amounts of D-Mannose are metabolized by the human body, much of it is rapidly excreted in the urine. In the bladder, D-Mannose can adhere to undesirable foreign particles, preventing them from sticking to the lining of the bladder.\* These particles can then be flushed away during urination. Because insignificant amounts of D-Mannose are used by the body, it does not interfere with blood sugar regulation.\*
