A Dietary Supplement
Vegetarian Formula

SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® 1 to 2 times daily before meals. **Make sure to take on an empty stomach.**

Serrazimes® is a proteolytic blend composed of enzymes derived from the edible fungi, *Aspergillus oryzae* and *Aspergillus niger*. Scientific studies indicate that Serrazimes® may help maintain and support cardiovascular and lymphatic health through its ability to help break down excess fibrin.* Serrazimes® may also help support the immune system and promote a healthy response to external stresses.* Serrazimes® is safe and effective when used as directed, providing enzymatic activity equivalent to Serrapeptase (aka, Serrapeptase).*

*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.

CODE P2954

V4

Serrazimes® is a vegetarian source of proteolytic enzymes derived from fungi. Proteolytic enzymes, or proteases, help to break down and digest protein.*

When taken on an empty stomach, Serrazimes® can be absorbed into the bloodstream. Studies have shown that Serrazimes® may help to break down circulating proteins that are produced by the immune system, thereby supporting a healthy inflammatory response. Serrazimes® may temporarily lessen minor pain associated with occasional overexertion. In addition, because it can digest fibrin, Serrazimes® can help to support cardiovascular health.*

Cautions and Interactions

In studies, proteolytic enzymes are believed to have proven to be quite safe, although they can occasionally cause digestive upset and allergic reactions.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
