90Vcaps®

A Dietary Supplement Vegetarian Formula

SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® with or before each meal containing dairy. One Vcap® digests dairy products equivalent to one cup of whole milk.

Dairy Digestion™ is a comprehensive blend of enzymes that is formulated to aid in the digestion of dairy products. Many people avoid dairy because it is difficult to digest. This difficulty may be related to the types of sugars, proteins and fats that are unique to dairy products. Digestion of the milk sugar lactose* requires a specific enzyme known as lactase. Dairy Digestion contains enzymes that specifically target milk proteins and fat for digestion. With Dairy Digestion™, it is possible to ease temporary discomfort associated with the incomplete digestion of dairy products, while enjoying the taste and health benefits of them as well.

Many people avoid eating and enjoying dairy products because they can be difficult to digest. The sugars, proteins and fats contained in milk and dairy products are hard for the body to break down. Protocol for Life Balance® Dairy Digestion™ was formulated specifically with selected enzymes to help in the digestion of the constituents of dairy products. Containing a broad range of enzymes that aid digestion of all the components of dairy—milk sugar (lactose), milk protein (casein) and milk fat, Dairy Digestion™ delivers maximum, vegetarian digestive support plus temporary relief from common discomfort that can accompany the consumption of dairy foods.*

This exceptional and exclusive formulation contains enzymes from *Aspergillus niger* (a black fungus) and *Aspergillus oryzae* (a fungus used in Chinese and Japanese cuisine to ferment soybeans). These fungal derived enzymes have been shown to be effective in a wide pH range for optimal digestive activity and are appropriate for vegans. In addition, lactase has been added to aid in the digestion of lactose, the sugar that is naturally found in milk.* Because dairy products can be more easily and completely broken down with the use of Dairy Digestion™, absorption and utilization of nutrients are also enhanced.*

Cautions and Interactions

There are no known drug interactions.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are extra-of-the-art and exceed basic lab requirements.
