New from Country Life! Omega Surge™ is an innovative technology that delivers valuable Omega 3•6•9 fatty acids from flax seed oil, boragin seed oil, and highly purified fish oil in the new, unique, form of a fun, tasty emulsified gummy.

Omega Surge™ was developed using a new, innovative and patent pending technology called ConCordix® that pre-emulsifies the oils and then captures the concentrated omegas through a unique gel matrix. The pre-emulsification process takes valuable Omega fatty acids and converts them into micro droplets before they are sealed in a gel form. By dividing these omega fatty acids into micro droplets, a greater surface area of the oil is exposed, upon ingestion, to important digestive processing agents such as enzymes.

The ConCordix® technology creates the unique combination of pre-emulsified omegas delivered in tasty gummies for an enhanced delivery system of Omega fatty acids.
