

Suggested Usage: As a dietary supplement, take 1 capsule 2 times daily.

Glutamine has recently been the focus of much scientific interest. A growing body of evidence suggests that during certain stressful times, the body may require more glutamine than it can produce. Under these circumstances glutamine may be considered a "conditionally essential" amino acid. Glutamine is involved in maintaining a positive nitrogen balance (an anabolic state) and also aids rapidly growing cells (immune system lymphocytes and intestinal cell enterocytes). In addition, glutamine is one regulator of acid-base balance and a nitrogen transporter.*

This bottle may contain an insert packet to ensure the freshness of its contents. These packets are not edible and should be discarded.
