

USAGE: Take 1 to 4 capsules per day in divided doses. Capsules should preferably be taken on an empty stomach, though they may also be taken with food, or as directed by your qualified health care consultant.

Storage Instructions: **Jarro-Dophilus EPS®** is room temperature stable and does not require refrigeration. Refrigerating **Jarro-Dophilus EPS®** is optional and will further extend the shelf-life by safeguarding the product from heat, especially during the hot summer months. Blister packaging each capsule provides extra protection to the probiotic bacteria against external moisture and oxygen.

Jarro-Dophilus EPS® is a Stable-Dophilus® due to its stability at room temperature and enteric coating which protects the probiotic bacteria from stomach acid. Eight (8) different strains of probiotic bacteria are delivered directly into the small intestines where probiotic bacteria fully exert their beneficial effects.* Probiotic bacteria in **Jarro-Dophilus EPS®** are selected from the following 4 genera:

*Lactobacillus, Bifidobacteria,
Lactococcus and Pediococcus.*

Strains in **Jarro-Dophilus EPS®** promote healthy intestinal microflora, which in turn helps to support intestinal health and immune function.* *Bifidobacteria longum* BB536 (Morinaga strain) has been clinically shown to stimulate immune response and suppress intestinal putrefactive bacteria.* *L. rhamnosus* R0011 is a unique, high producer of polysaccharides that facilitate colonization and stimulate intestinal immune response.* *L. acidophilus* R0052 assists in breaking down lactose (milk sugar) which may improve digestion of dairy products by those individuals who are lactose intolerant.* *Lactococcus* and *Pediococcus* help reduce spoilage caused by unfriendly bacteria in fermented foods.

Keep out of the reach of children.
