PROTOCOL
FOR LIFE BALANCE™

High Potency CoQ10 400 mg

- Supports Healthy Heart Muscle*
- With Lecithin & Vitamin E

10% of profits donated for health research

60 Softgels

A Dietary Supplement

SUGGESTED USAGE: As a dietary supplement, take one softgel daily with a meal. Take softgel with 8 oz. of water or other beverage. For intensive use, take up to 3 softgels daily under the supervision of a health care practitioner.

Coenzyme Q10, also called ubiquinone, is present in almost all cells, where it is necessary for mitochondrial energy production.* The body's highest concentrations of Coenzyme Q10 (CoQ10) are found in the heart, where constant chemical energy availability is imperative. In addition to its benefits for cardiac function through energy production, CoQ10 also functions as a powerful fat soluble antioxidant, providing protection against free radical attack for vascular structures, as well as for other tissues.*

*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.

Protocol For Life Balance™ also offers CoQ10 in smaller softgel, powder and liquid forms.

Do Not Eat Freshness Packet. Keep in Bottle.

Store in a cool, dry place. Please Recycle.

V2

Coenzyme Q10 (CoQ10) is a fat-soluble vitamin-like substance found in all cell membranes of the body. It is vital to assist the production of energy by allowing the mitochondria to convert digested food within the cell.*

Although CoQ10 is found naturally in the human body, especially in heart and liver cells, low levels of CoQ10 have been found in a wide variety of animal and human subjects during clinical studies. It is believed that as we get older our ability to produce CoQ10 decreases.

CoQ10 works as an antioxidant. An antioxidant protects cells from chemicals known as free radicals (which can damage important parts of cells). Because of its antioxidant properties, CoQ10 is widely recognized for its potential impact on heart health.*

CoQ10 also called ubiquinone, is present in almost all cells, where it is necessary for mitochondrial energy production. The body's highest concentrations of CoQ10 are found in the heart, where constant chemical energy availability is imperative. In addition to its benefits for cardiac function through energy production, CoQ10 also acts as a powerful fat soluble antioxidant, providing protection against free radical attack of vascular structures and other tissues.*

Cautions and Interactions

CoQ10 may reduce the anticoagulant effect of warfarin. In addition, CoQ10 may interact with certain blood pressure medication, including diltiazem, metoprolol, enalapril, and nitrate. Statin medications have been shown to decrease CoQ10 levels in the body and CoQ10 supplementation may be useful when taking these drugs.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
