CODE P3281 V2

Ortho Detox™ is a cutting-edge nutritional supplement formulated to support your body's natural defenses against toxic substances.*

For most of us during our lifetime, knowingly or unknowingly, we have absorbed toxins in the form of preservatives, chemicals and harmful substances. In most cases, an effective detoxification program generally includes an improved diet, better nutrition, removing toxins from the body, and supporting the desired flora (good bacteria) in your internal system.

This very unique and effective formula contains a proprietary blend of Beet Root powder, Red Clover extract, Chlorella, Bladderwrack, MSM, Dandelion Root, Oregon Grape, Milk Thistle, Zinc, Selenium, Copper, and ALA (*Alpha*-Lipoic Acid). These potent nutrients and herbs are well recognized for working together to help support detoxification mechanisms and promote a healthy internal environment.*

Cautions and Interactions

Based on their constituents, red clover extracts may interfere with hormone treatments, tamoxifen, and anticoagulant drugs.

Animal studies suggest that dandelion may worsen the side effects associated with lithium, a medication used to treat bipolar disorder.

Based on dandelion root's effect on bile secretion, Germany's Commission E has recommended that it not be used by individuals with obstruction of the bile ducts or other serious diseases of the gallbladder, and only under physician supervision by those with gallstones.

Because Oregon grape contains berberine, which has been reported to cause uterine contractions and to increase levels of bilirubin, oral consumption of Oregon grape should be avoided by pregnant women.

Milk Thistle may affect the liver's metabolism of alcohol and acetominophen, butyrophenones (such as haloperidol) and phenothiazines (such as chlorpromazine, fluphenazine, and promethazine), phenytoin, halothane, cisplatin and cyclosporine.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
