

PROTOCOL
FOR LIFE BALANCE™

Protocol For Life Balance™ is a researched, potent and efficacious brand of dietary supplements exclusively available through licensed health care practitioners. Protocol For life Balance™ was uniquely created to help reduce the top ten health causes of death. We pledge to donate 10% of pre-tax profits to well recognized and accepted research and nutritional organizations, such as the National Health Research Institute (www.citizens.org/consumer-corner).

Protocol For Life Balance™ products are produced in our GMP "A" rated facility. Our large QA/QC staff utilizes sophisticated analytical instruments such as HPLC's, FTIR, UV-VIS, GC and GCMS, plus a complete microbiology lab. We guarantee the quality of our products and provide a money-back guarantee if any patient is less than 100% satisfied.

Protocol For Life Balance™ supplements are manufactured under Good Manufacturing Practices (GMP) as certified by the Natural Products Association (NPA). Our facility has consistently received an "A" rating from this third-party audit, and we were one of the first companies to be certified as GMP. We test our raw materials in-house, as well as independently when needed, to make sure that our products meet or exceed our own exacting product specifications.

PROTOCOL
FOR LIFE BALANCE™

Our proprietary Stevia Extract is produced utilizing a patent-pending process which involves extraction from stevia leaves using only water and alcohol. The resulting extract is treated with a vegetarian-source enzyme (amylase) to reduce the licorice-like aftertaste of regular stevia extracts.

The following are not used or allowed: pesticides, fumigants, irradiation, other solvents or sulfur dioxide. There are no carriers or flow agents added to the extract other than what we claim on the label. The resulting extract contains no less than 80% Glucosylsteviosides as measured by HPLC testing.
