

Supplement Facts

Serving Size 1 capsule

Amount per serving	% DV
Vitamin D3 (cholecalciferol) 625 mcg (25000 i.u.)	4167
Zinc (as orotate) 15 mg	136

Excipients:

Microcrystalline cellulose

Suggested Use:

1 capsule per day for a 150 lb (68 kg) person. Smaller persons should space doses further apart (for example, every other day). Do not use D3ZO concurrently with high-dose calcium supplements, as this could raise blood calcium excessively.

D3ZO

High potency vitamin D3

DIETARY SUPPLEMENT

25K

30 capsules

Vitamin D3 enhances dietary calcium absorption and raises blood calcium levels. Clinical studies have shown that higher consumption of vitamin D3 and higher blood calcium levels are correlated with lower incidence of cancer, bone fractures, and osteoporosis. D3ZO is a very high potency D3 supplement with added zinc to suppress the aging effects of higher calcium levels. See our website for details: www.lifelinknet.com/siteResources/Products/D3ZO.asp
