PROTOCOL
FOR LIFE BALANCE™

SUGGESTED USAGE: As an herbal dietary supplement, take 1 Vcap® 1-2 times daily, preferably with meals.

One Vcap® of Protocol For Life Balance™ EGCg, 200 mg, possesses the polyphenol content equal to about 2-3 cups of green tea. Green Tea Extract contains numerous compounds, including Polyphenols and Catechins, that provide potent antioxidant benefits.* One catechin in particular, EGCg, has demonstrated extraordinary free radical quenching power in laboratory studies. In non-clinical studies, EGCg has also been shown to be protective against chemical and environmental assault on tissues and helps to support healthy cell cycle regulation.

Do Not Eat Freshness Packet. Keep in Bottle.

Store in a cool, dry place. Please Recycle.

CODE P4704

One capsule of Protocol For Life Balance™ EGCg

contains the equivalent amount of the catechins EGCg as approximately 2-3 cups of green tea. Green tea has been used in ancient China since at least 2700 BC. The traditional Chinese herbal system continues to use green tea to support a number of health concerns.*

The active ingredients in green tea are a family of polyphenols. The primary catechin in one polyphenol family is epigallocatechin gallate (EGCg). This polyphenol in particular is believed to be responsible for a number of green tea's health benefits. EGCg is known to have strong antioxidant properties, which can help to support the healthy function of vascular tissues and genetic integrity.*

Cautions and Interactions

Green tea may affect the effectiveness of beta-lactam antibiotics. In addition, green tea should not be mixed with blood thinners such as aspirin and warfarin because using the two together may increase your risk of bleeding.

Green tea has been shown to interact with lithium and doxipine.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
