V2

Ginkgo Biloba comes from a very unique and ancient tree, one of the oldest species of trees on earth. The name "Ginkgo" comes from its scientific Chinese name, "silver pine," and the Chinese have used Ginkgo for thousands of years.

First introduced to Europe in the 1700's, Ginkgo is one of the most researched herbs in the world. It is widely recognized in promoting optimal circulation, healthy cognitive function, free-radical destruction and cellular protection.

This unique formula includes Eleuthero (an herb whose properties are very similar to Ginkgo) and Gotu Kola (a plant widely used in Ayurvedic and traditional Chinese medicine). Our Ginkgo Biloba is grown and extracted under the highest quality procedures, and standardized to a minimum of 24% Ginkgolivonoglycosides and minimum of 6% Terpene Lactones. Standardization helps to ensure that the quality of the herb is consistent, which is extremely important to assure the effectiveness of this product.

Cautions and Interactions

Ginkgo is generally well tolerated in the suggested usage range and has an excellent safety profile. There are rare reports of bleeding, dizziness, stomach upset, headache, depression of heart rate, loss of consciousness, loss of muscle tone, weakness, hives, muscle weakness, loss of muscle tone, numbness, tingling around the mouth, and loss of muscle tone. Side effects around the mouth with the use of Ginkgo. This herb may affect blood pressure and blood clotting times. Significant bleeding would appear to be limited to pregnancy and lactation, use of coumadin or other anti-coagulants. It is generally held that German authorities do not consider Ginkgo to exhibit significant interactions with other medications or to pose a danger during pregnancy and lactation.

Guaranteed Quality

This is an FDA regulated dietary supplement that is produced in an FDA inspected third party inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods with capabilities that are state-of-the-art and exceed basic lab requirements.
