60Vcaps®

A Dietary Supplement Vegetarian Formula

SUGGESTED USAGE: As an herbal dietary supplement, take 1 Vcaps® 2 to 3 times daily, preferably with meals. For intensive use, increase dosage as directed by a health care practitioner.

Curcumin is the major component of Turmeric (*Curcuma longa* L.). Extensive scientific research on Curcumin has demonstrated that it has potent antioxidant properties, as well as an ability to support a healthy inflammatory response. Through these and other mechanisms, Curcumin is shown to support cardiovascular health, maintain neuroprotective activity, and helps maintain a healthy cardiovascular system.*

V2

Turmeric is an herb that is cultivated widely in South and Southeast Asia for its commercial value. Turmeric is derived from the root of the plant, which has been used in the Ayurvedic tradition for centuries for its many beneficial properties. Curcumin, the active constituent of Turmeric, (*Curcuma longa* L.) is the pigment that gives this herb its characteristic yellow color.

Curcumin has more recently been recognized by the modern scientific community because of its impact on human health and consequently has been the subject of many laboratory studies. A large body of research has suggested that Curcumin possesses potent antioxidant activity, as well as the ability to help the body maintain balanced inflammatory responses.*

Through these and other mechanisms, Curcumin supports colon health, exerts neuroprotective activity, and helps to maintain a healthy cardiovascular system.*

Cautions and Interactions
Limited studies on animals suggest that turmeric extracts can be toxic to the liver when taken in high doses or for a prolonged period of time. For this reason, turmeric products should probably be avoided by individuals with liver disease and those who take medications that are hard on the liver.

Due to curcumin's possible stimulating effects on the gallbladder, individuals with gallbladder disease should use curcumin only on the advice of a physician.

Turmeric may affect the body's reaction to NSAIDs, including indomethacin and ibuprofen, as well as to reserpine, a medication used for high blood pressure.

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
