# Benfotiamine

Lipid-soluble Vitamin B-1

DIETARY SUPPLEMENT

**150**

150 mg / 100 capsules

Benfotiamine is a fat-soluble form of Vitamin B-1 that shows improved bioavailability and activity over Vitamin B-1 itself. Several dozen research studies dating from 1989 have generated interest in benfotiamine as a preventative for diabetic complications — including blindness, kidney failure, nerve damage, stroke, and cardiovascular disease.
