

Omega Nutrition as Nature Intended

Pure Alaska Omega Salmon Oil is an all-natural fish oil made from free swimming Alaskan Salmon found in the clean waters of the North Pacific. Our cold press extraction method is gentle, shielding the oil from damaging high heat, eliminating the need for additional refining or chemical treatments. The result is remarkably pure and naturally balanced Salmon Oil, delivering all omega-3 fatty acids as nature intended.

Why Wild Alaskan Salmon Oil? Alaska's salmon are naturally high in Omega-3 fatty acids and naturally free of mercury. This is because they swim freely in the clean, cold, and pristine waters of Alaska. They are harvested in well managed fisheries - the first and only certified sustainable wild salmon fishery in the world.

Pure Alaska Omega is produced exclusively by Alaska Protein Recovery, LLC, Juneau, AK (www.alaskaproteinrecovery.com)
