As we get older, the cartilage, tendons, and synovial fluid in our joints don't restore themselves as quickly. Glucosamine HCL, which is used in the synthesis of healthy joints, can help.* Chronomine™_{TR} is a new, patent pending technology that releases a consistent supply of glucosamine HCL and chondroitin for 24 hours.

DIETARY SUPPLEMENT

60 Coated Tablets (30 day supply)

Linix Time Release is a patent pending system that delivers consistent nutrition to the body over 24 hours. This is important because nutrients in non-time release and non-linear time release products may be digested and excreted before the body receives full benefit. Chronomine_{TR} releases a consistent amount of glucosamine and chondroitin every hour providing you with a steady supply of joint care nutrition all day and night.*

Linix Time Release products release a consistent amount of glucosamine and chondroitin for 24 hours.

Non-Linear Time Release and Non-Time Release products may not release nutrients in a way the body can best absorb or use them.

Chronomine_{TR} time release statements are based on in vitro release studies.
