SUGGESTED USAGE: As a dietary supplement, take 1 softgel twice daily, preferably with meals. We highly recommend taking this product with a source of essential fatty acids such as NOW® Flax Oil, Evening Primrose Oil, Borage Oil or Omega-3 Fish Oil. NOW® Ubiquinol CoQH-CF™ contains the reduced form of CoQ10 (Coenzyme Q10) which has been shown in scientific studies to be a highly bioavailable and active antioxidant form of CoQ10. The addition of d-Limonene to this product naturally improves its solubility, which further enhances intestinal absorption, and thereby provides superior overall biological value. Coenzyme Q10 is present in almost all cells, where it is necessary for mitochondrial energy production. The body's highest concentrations of CoQ10 are found in the heart, where constant chemical energy availability is imperative. In addition to its benefits for cardiac function through energy production, CoQ10 also functions as a powerful fat soluble antioxidant, providing protection against free radical attack for vascular structures, as well as for other tissues, including the brain and neurons.*
