

Directions

Add one level scoop (25.5 grams) of **All Natural Whey** to a 3-4 oz glass of water, milk, juice or blend with yogurt and fruit. When mixing, add liquid first, then powder and stir briskly until completely dispersed. **Low Carbohydrate Diet (Weight Management Program):** Recommended 1 scoop daily for those trying to increase their dietary protein intake while decreasing intake of carbohydrates.

Special Processing & Blend

All Natural Whey provides an optimal source of whey protein by combining an ultrafiltered, low temperature processed whey protein concentrate with cross flow microfiltered whey protein isolate. These specialized processing systems ensure a High Biological Value (HBV) protein source in the form of short and long chain peptides to increase protein retention and biological activity. **All Natural Whey** is also remarkably high in Branched Chain Amino Acids (BCAAs), which are the most required amino acids needed to replenish muscle stores that are utilized during strenuous exercise.**

The Next Generation Protein

The biochemists at **MRM** have taken protein supplementing to the next level without the worry of wasting ingested protein. The addition of **NITROZYME™** helps breakdown long and short chain peptides into smaller, more readily absorbable amino acids for maximum absorption and retention.** **NITROZYME™** helps the body release more amino acids directly into the muscles to increase muscle size, strength and lean body mass.**

Added L-Glutamine

All Natural Whey also contains 1g of L-Glutamine (in addition to naturally occurring L-Glutamic acid) per serving to decrease recovery time following exercise.**

Supports Immune Health

Specific characteristics of whey proteins have shown an ability to support immune health.** Whey protein contains high amounts of cysteine and other substrates used in the synthesis of Glutathione.** Glutathione is a major antioxidant and supports immune health.**

Typical Amino Acid Profile
Per 25.5g Scoop

Alanine	800mg
Arginine	400mg
Aspartic Acid	1910mg
Cysteine	220mg
Glutamic Acid	3000mg
L-Glutamine	1000mg
Glycine	400mg
Histidine	250mg
Isoleucine	1110mg
Leucine	1630mg
Lysine	1540mg
Methionine	330mg
Phenylalanine	530mg
Proline	1070mg
Serine	910mg
Threonine	1040mg
Tryptophan	380mg
Tyrosine	440mg
Valine	1040mg

The Protein Blend in All Natural Whey contains the following supportive immunofactors:

48-52% beta-lactoglobulin
18-22% alpha-lactoglobulin
20-22% glyco-macro-peptide
2% immunoglobulins
0.5-1% lactoferrin

- NO Aspartame or Acesulfame K
- No MSG
- Highest Biological Value Protein
- ZERO Added Sugars
