

L-carnitine is a nutrient that promotes energy production in cells by transporting fatty acids into the mitochondrion, an intracellular structure that generates metabolic energy in the form of ATP.* In this role, L-carnitine helps the body efficiently metabolize fat.* Fumarate is a naturally occurring compound in the body. Fumarate serves as an intermediate in the Krebs cycle, a key energy-producing process that takes place in the mitochondrion.*

The L-Carnitine Fumarate in this product is derived from a base of pharmaceutical grade L-Carnitine manufactured by a patented, FDA- approved process. It is GMO-free, pesticide-free, and BSE free.

Helps the body burn fat for energy*

Helps maintain normal cardiovascular health*
