University studies show that an active adult should get their body weight in protein grams, so the average male weighing 185 pounds should be getting 185 grams or more of protein a day... think about it, it's nearly impossible to get that much protein from the foods we eat on a daily basis due to our hectic lifestyles. However, now that you use Sublime Whey™, you can add 2-3 Sublime Protein Shakes a day and get a quick, easy and VERY tasty extra 60+ grams of ultra-high quality whey protein to your diet.* (Try our **Sublime Sludge** or the **Chocolate Peanut-Butter Sublime Brownie** recipes for an amazing diet approved treat; see below for details!)

Did you know that Sublime Whey™ is produced from grass fed, healthy New Zealand cows (no hormones) sourced from local dairy farms; this means you're safe from exposure to rBGH (Recombinant Bovine Growth Hormone). Many nutrition and weight loss dairy powders on the market are made from ingredients originally produced overseas. In other countries laws allow cows to be injected with rBGH. rBGH stimulates greater production of milk and causes suffering for millions of cows by making them sick. It's not a legal requirement for hormone tainted protein powders to identify this - nice to know your Sublime Whey™ is 100% pure, safe and certified hormone free!!*

Since Sublime Whey™ is Gluten, Casein and Aspartame free as well as certified hormone free its perfect for busy parents looking for a tasty, quick and easy snack for their children before rushing out the door or add some frozen fruit and make a healthy smoothie for a fraction of the cost you'd pay at a retail store. Whey protein has been proven to aid in quicker weight loss for those on diets and is KEY for building strong muscles in the gym and is a must for proper recovery after your workouts. As you can see Sublime Whey™ truly is the perfect protein that's safe, effective and very tasty... it's, well in a word, Sublime! Enjoy!!
