- Advanced Blend of Patented Creatines Produce Explosive Power and Strength with No Bloating!
- GlycoRush™ Endurance Promoting Carbohydrates Deliver Instant Muscle Glycogen to Sustain Workout Intensity!

DIRECTIONS FOR USE ON TRAINING DAYS: As a dietary supplement, mix 1 scoop with 6-8 oz of water 15 minutes prior to exercise, on an empty stomach. Due to the potency of New HyperShock, start by taking ½ scoop for the first few workouts before progressing to a full scoop to assess your tolerance. Once you have determined your tolerance to 1 scoop, advanced users may add an extra ½ scoop. Due to the massive dose of nutrients, some users may find it beneficial to consume a protein shake or small meal 30 minutes before consuming this product.

NON TRAINING DAYS: Take ½ the amount you consume on training days.

DO NOT TAKE: Within 6 hours of bedtime. Do not combine with any other stimulants.

*This statement has not been evaluated by the FDA. This product is not intended to diagnose, cure or prevent any disease.
