Creatine Monohydrate is a naturally occurring compound found in the human body and obtained in the diet primarily from meat and fish. Creatine is a popular supplement among active individuals because of its ability to serve as an energy reservoir, especially during intense physical exertion. During short, intense bursts of activity, the body breaks down adenosine triphosphate (ATP) into adenosine diphosphate (ADP) and phosphate for energy. Creatine helps the body convert ADP back to ATP, providing greater amounts of ATP for energy, which may increase short-term endurance and strength. Creatine can also be stored for later use by cells, creating the "energy reservoir" active individuals desire. * NOW® Creatine Monohydrate is 100% pure and contains no additives or preservatives.

SUGGESTED USAGE: As a dietary supplement, mix 1 heaping teaspoon in fruit juice or other sweetened liquid 3 to 4 times daily, before and after exercise, for the first 7 days. Thereafter, for maintenance use, consume 1 to 3 times daily. Allow 3 to 4 hours between doses. For continuous use beyond 28 days, use one serving daily. Consider taking this product in combination with NOW® Pyruvate, D-Ribose and Carbo Gain.

CREATINE Monohydrate

100% Pure Powder
ATP Energizer*

Net Wt. 21.2 oz. (600 g)

Supplement Facts

Serving Size 1 Heaping Teaspoon (5.0 g)

Servings Per Container 120

	Amount Per Serving	% Daily Value
Calories	15	
Creatine Monohydrate	5.0 g (5,000 mg)	†
† Daily Value not established.		

Other ingredients: None.

Contains no sugar, salt, starch, yeast, wheat, gluten, corn, soy, milk, egg, shellfish or preservatives.

Creatine may be especially useful for those doing short-term, intense exercise, such as weight lifting, football, basketball, swimming, skiing or cycling.

This product is sold by weight not volume.

Store in a cool, dry place. Please Recycle.
