MSM (Methylsulphonylmethane) is a natural form of organic sulfur found in all living organisms. This natural compound, researched since 1979, provides the chemical links needed to form and maintain numerous different types of tissues found in the human body, including connective tissue such as articular cartilage.* While MSM is a natural component of almost all fresh fruits, vegetables, seafood and meat, food-processing methods reduce sulfur levels, making supplementation more important than ever.

SUGGESTED USAGE: As a dietary supplement, take 1/2 teaspoon 1 to 2 times daily in juice or other liquid. If intestinal gas occurs, reduce dosage. Consider taking this product in combination with NOW® Glucosamine, Chondroitin and Celadrin®.

A Dietary Supplement Vegetarian Product

MSM Powder

Methylsulphonylmethane

JOINT SULFUR

- For Connective Tissue
- For Healthy Cartilage*

Net Wt. 1 lb. (454 g)
