weight.*

7-KETO® is a naturally occurring metabolite of DHEA that does not affect hormone levels, but is known for its anti-aging properties. Because the body's production of DHEA declines with age, so does the production of 7-keto-DHEA. Weight gain is a common sign of aging that often accompanies the decreased production of DHEA and its metabolites. 7-KETO® has been patented for its ability to promote thermogenesis as well as for the maintenance of healthy body

SUGGESTED USAGE: As a dietary supplement, take 1 capsule 2 times daily, preferably with food. Consider taking these other NOW® products: CLA, L-Carnitine and T-Lean®.
