to convert into fat and store as adipose tissue.*

NOW® PHASE 2® helps you achieve dietary management objectives without the use of stimulants or laxatives. PHASE 2® is an all-natural bean extract that has been shown in non-clinical studies to help reduce the breakdown and absorption of complex carbohydrates, by limiting the action of alpha-amylase, a digestive enzyme. Alpha-amylase helps break down dietary starches into glucose so that they can be absorbed by the digestive tract. With less alpha-amylase activity, there may be less excess glucose available

SUGGESTED USAGE: As a dietary supplement, take 3 Vcaps® before any meal containing complex carbohydrates or starches, or as directed by a healthcare practitioner.

Caution: Not to be used by diabetics, hypoglycemics or pregnant/lactating women unless recommended by a healthcare practitioner.
