

IRON SUPPLEMENT  
FOR INFANTS AND CHILDREN  
UNDER 4 YEARS OF AGE

**Fer-iron**  
**drops**  
**Rugby**

**DIRECTIONS:** Fill dropper to prescribed level and dispense with a single firm squeeze of the dropper bulb. The full prescribed dose will be given if it is normal for a small amount of the solution to remain in the tip of the dropper. May be given directly into the mouth or mixed with water or fruit juice. Fer-iron drops should be given immediately after meals.

### Supplement Facts

Serving Size 1 mL

Amount per 1 mL	% Daily Value	
	Infants <12 months	Children under 4 years
Elemental Iron 15 mg (as ferrous sulfate)	100%	150%

**Other Ingredients:** Purified water, ascorbic acid solution, sucrose, citric acid, alcohol (0.2% v/v), sodium bisulfite, natural and artificial lemon flavor.

**WARNING:** When a child or infant is taking iron, stools may appear darker in color. This is to be expected and should be no cause for alarm. When drops containing iron are given to young babies, some darkening of the membrane covering the baby's teeth may occur. This is not serious or permanent nor does it affect the enamel of the teeth. If this darkening or staining occurs, it may be removed by rubbing the baby's teeth once a week with a little baking soda on a small cloth.

**Keep out of reach of children.** This product contains iron, which can be harmful or fatal to children in large doses. In case of overdose, seek professional assistance or contact a Poison Control Center immediately.

Store at room temperature 15°-30°C (59°-86°F).
