Magnesium is a mineral that is critical for energy production and metabolism, muscle contraction, nerve impulse transmission and bone mineralization. It is a required cofactor for an estimated 300 enzymes. Among the reactions catalyzed by these enzymes are fatty acid synthesis, protein synthesis and glucose metabolism. Magnesium status is also important for regulation of calcium balance through its effects on the parathyroid gland.*

SUGGESTED USAGE: As a dietary supplement, take 1 capsule with or between meals. Consider taking these other NOW® products: Calcium, Boron, Vitamin D and Zinc.

Magnesium Caps

NERVOUS SYSTEM SUPPORT

400 mg

- Supports Energy Production
- Critical for Enzyme Function*

180 Capsules

A Dietary Supplement
