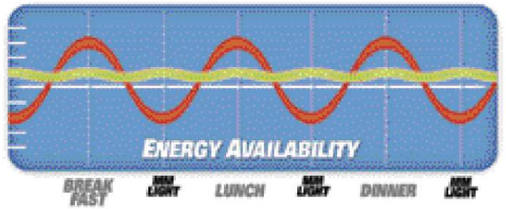
CytoSport has been overwhelmed by the amazing success of **Muscle Milk**. If there has been one repeated request, it's "Make Muscle Milk with less fat and fewer calories, but keep the **SAME GREAT MUSCLE MILK TASTE!**" Well… we heard you.

Introducing **Muscle Milk Light** – Same Great Performance – Same Great Taste – **1/3 the FAT and 44% FEWER CALORIES** than original **Muscle Milk**.

Muscle Milk Light is scientifically designed for individuals who want to maximize lean muscle gains while reducing caloric intake to help with weight management or weight loss.

Maintaining healthy blood sugar levels is the key to responsible weight control. Snack cravings and low energy levels are often the result of poor blood sugar management. With proper management, you don't have to sacrifice *how you feel* while you change *how you look.*

When used with balanced, portion controlled meals, **Muscle Milk Light** ensures proper energy and amino acid availability. This results in more daily energy, less hunger cravings, and more normalized insulin levels.



Two or three servings of **Muscle Milk Light** spaced between balanced, portion controlled meals helps provide long-lasting hunger satisfaction. **NEVER HUNGRY, MORE ENERGETIC.** When combined with resistance and weight training, this small portion technique will help promote lean muscle mass, the very element crucial to **BURNING STUBBORN, STORED FAT.**

Fueling your body with high quality nutrients is the smart way to manage your weight. **Muscle Milk Light** is the perfect solution to *fill the gaps* in your daily nutritional program. – **Enjoy!**
