RESTORE—Lifestyle, metabolic and physical stress deplete the body of amino acids (the building blocks of protein and muscle tissues) - restoring the amino acid pool promotes overall good health and well being.

REBUILD—A rich amino acid pool is critical to the rebuilding of muscle tissues damaged as a result of intense

exercise. Whey protein's high ratio of branch chain amino acids (L-Leucine, L-Isoleucine and L-Valine) to essential amino acids serves as an excellent catalyst for the rebuilding process.

RECOVER—Elite athletes and active individuals require more daily protein. Cytosport Whey Isolate Drink is a naturally complete, convenient and essential source of quality protein containing all of the essential amino acids required in the daily diet.
