# ISO•100

Has the highest Protein  
Percentage in its Class

**25g of protein  
per serving** X 100 = **90%  
Protein**

*Take the protein percentage challenge.*  
You will be amazed how other protein powders  
numbers add up in this equation.

**DYMATIZE ISO•100** derives its name from its protein source, 100% Whey Protein Isolate. Unless you are in the medical profession, you have probably never seen protein like this before.

Most companies "claim" they use Whey Protein Isolate, but after one serving of Dymatize ISO•100 you can instantly see, taste and even feel the difference! Our Whey Protein Isolate has been processed to the zenith of perfection, 100% hydrolyzed and instantized and taken through no less than 5 quality controlled steps. Both lactose and fat have been removed from ISO•100, leaving you with nothing but the most easily digested, assimilated and most bio-available source of protein on the market.

We know that maximum protein utilization is essential to aiding muscle recovery and maintaining a positive nitrogen balance, which is critical during periods of intense training. There is no higher standard of protein than ISO•100, so feel confident that you will be feeding your muscles to their fullest potential!

Check the stats: each serving has an astonishing 25 grams protein, with "0" Carbs & "0" Fat.\* Look closer. You will see that all this is in a serving size of about 28 grams, making ISO•100 90% protein by weight! Nothing out there matches our formula, nothing even comes close.

The meticulous processing of Dymatize Whey Protein Isolate gives you "instant mixability" in its true form. You won't believe how quickly zero lactose\*, Dymatize ISO•100 could be the easiest protein to digest on the market today.\*

Don't forget, with "0" carbohydrates\*, Dymatize ISO•100 is perfect for low carb diets.\*
