

L-GLUTAMINE – THE ATHLETE'S AMINO ACID

Glutamine is the most abundant amino acid in the body. It serves a broad range of critical roles, including immune function support, digestive tract health, energy production and in the building and protecting of lean muscle mass. Normally, the body generates plenty of its own glutamine stores; therefore, it is considered to be a "non-essential" amino acid. However, during times of stress (both physical and mental), increased demand for glutamine may far outpace the body's ability to produce it. This is when glutamine becomes a "conditionally essential" amino acid for ensuring optimal physiological functions. This is why supplemental glutamine intake is immeasurably beneficial for supporting the needs of hard-training athletes and fitness enthusiasts.**

CytoSport™ **L-GLUTAMINE** is 100% pure Ajipure® **L-GLUTAMINE**. Why did we choose Ajipure? Simple- it meets our exceedingly high standard of excellence. Ajipure delivers pharmaceutical grade **L-GLUTAMINE** for unprecedented quality and efficacy. Rest assured - when you consume CytoSport **L-GLUTAMINE** - you are "feeding" your body with the highest quality **L-GLUTAMINE** money can buy. Why settle for anything less?*
