SUGGESTED USAGE: As a dietary supplement (for children and adults), take 1 chewable tablet daily with a fat containing meal or as directed by your healthcare practitioner.

HOW IT WORKS: The major biologic function of vitamin D is to maintain healthy blood levels of calcium and phosphorus. Vitamin D supports bone health by promoting calcium absorption and bone mineralization.* Vitamin D also plays an important role in healthy immune function, and helps to regulate cell growth and differentiation.*

CAUTIONS/INTERACTIONS: Vitamin D should be used cautiously by those taking cardiac glycosides and anyone with hypercalcemia. For more information on this product go to www.protocolforlife.com/P0357.

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
