SUGGESTED USAGE: As a dietary supplement, take 1 softgel 2 to 3 times daily, preferably with food. For intensive use, take up to 1200 mg total per day (2 softgels, twice daily) under the supervision of your healthcare practitioner.

HOW IT WORKS: Pantethine, a highly absorbable and biologically active form of pantothenic acid (Vitamin B-5), is the reactive component of Coenzyme A (CoA) and the acyl-carrier protein (ACP). CoA and ACP are extensively involved in the metabolism of carbohydrates, lipids and amino acids. Numerous clinical and nonclinical studies suggest that pantethine can support healthy serum lipid levels that are already within the normal range.* Pantethine has also been shown to exert a number of beneficial effects on the liver and vascular endothelium through its ability to support healthy lipid metabolism in these tissues.*

CAUTIONS/INTERACTIONS: No significant side effects have been reported for pantethine, used by itself or with other medications. For more information on this product, go to www.protocolforlife.com/P0487.

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
