V1

SUGGESTED USAGE: As a dietary supplement, take 2 softgels 1 to 2 times daily, preferably with meals, or as directed by your healthcare practitioner.

HOW IT WORKS: Gamma-Tocopherol (Gamma-TOH) represents the primary dietary form of Vitamin E in the U.S. Recent scientific studies indicate that Gamma-TOH possesses unique functions that distinguish it from other forms of Vitamin E. Gamma-TOH works within the Vitamin E complex to trap and remove free radicals from the body.* It also quenches nitrogen radicals and helps to balance the inflammatory response.* Gamma-E Complex provides the necessary full range of antioxidant protection of Vitamin E because it contains a natural balance of Tocopherols plus a full complement of Tocotrienols. As a complex, the Vitamin E family acts to stabilize cell membranes, provide support for a healthy neurological system, and plays a role in the maintenance of cardiovascular health.*

CAUTIONS/INTERACTIONS: Vitamin E may interact with blood thinning medications, including anticoagulant, anti-platelet and anti-inflammatory medications. It may also interact with cyclosporine and chemotherapy regimens. If you are taking any of these medications, or if you plan to have surgery, consult your healthcare practitioner before using this product. For more information on this product go to www.protocolforlife.com/P0818.

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
