SUGGESTED USAGE: As a dietary supplement, take 1 capsule daily, preferably with a meal. For intensive use, take up to 5 capsules daily, under the supervision of your healthcare practitioner.

HOW IT WORKS: ChromeMate® (also called chromium nicotinate, chromium polynicotinate or niacin-bound chromium) is a patented oxygen-coordinated niacin-bound chromium complex that plays an important role in proper insulin function, normal energy production, promotion of healthy body weight, and maintenance of blood sugar and cholesterol levels that are already within the healthy range.* Protected by three U.S. Patents, four international patents and other world-wide patents pending, ChromeMate® is the only niacin-bound chromium supplement with proven biological activity.*

CAUTIONS/INTERACTIONS: Animal studies suggest that antacids, particularly those containing calcium carbonate, may reduce the body's ability to absorb chromium. Chromium supplements may interact with certain diabetes medications such as insulin, metformin, and sulfonylureas. Carefully monitor blood sugar levels if you are concurrently taking chromium with these medications. Medical supervision in these cases is advised.

Corticosteroids may increase the need for chromium. For more information on this product go to www.protocolforlife.com/P1415

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
