SUGGESTED USAGE: As a dietary supplement, take 1 softgel 3 times daily, or as directed by your healthcare practitioner.

HOW IT WORKS: CLA (Conjugated Linoleic Acid) is a fatty acid naturally found in beef and dairy products. However, due to changes in agricultural practices, today's foods contain less CLA, contributing to its decreased availability in modern diets. Numerous clinical studies have demonstrated CLA's role in the maintenance of healthy body weight through its favorable effect on body composition.* These studies have shown that CLA supplementation can support healthy body fat content while promoting the production of lean tissue without adverse side effects.* Furthermore, initial body composition changes with CLA supplementation are maintained over time, indicating its prolonged positive effects.* CLA Away™ also contains L-Carnitine. L-Carnitine is an amino acid that is necessary for the transfer of fatty acids into the fat-burning parts of the cell, facilitating energy production from fat.* The combination of these two compounds, therefore, can produce a synergistic effect, making CLA Away™ an ideal supplement for weight management.*

CAUTIONS/INTERACTIONS: Some studies suggest that CLA supplementation may have idiosyncratic effects on blood sugar levels. Diabetics using this product should closely monitor serum glucose levels. Carnitine may affect the body's metabolism of certain pharmaceutical medications such as Doxorubicin and AZT. In addition, the need for Carnitine may be increased by Valproic Acid and Isotretinoin.* For more information on this product go to www.protocolforlife.com/P1731.
