Intestinal flora - a key component of immune response *

used extensively to provide sound immune system support. ImmunEnhancer™ is a non-digestible soluble fiber from Larch that has been included as a prebiotic supplement and helps in supporting healthy

seasonal and year-round immune function. This potent herbal formula is

fuelled by Allisure®, a clinically-tested, safe and unique form of stabilized

Allicin. Allicin is responsible for the strong immune supporting properties

in garlic, and has become an increasingly popular way to promote overall

wellness. In addition to Allisure®, we've added Elderberry Extract, Olive

Leaf Extract and Oregano Oil - three natural compounds that have been

used extensively to provide sound immune system support.
