SUGGESTED USAGE: As a dietary supplement take 1 softgel 1 to 3 times daily with or between meals or as directed by your healthcare practitioner.

HOW IT WORKS: Phosphatidyl Serine is a phospholipid compound derived from soy lecithin that plays an essential role in cell membrane composition, conduction of electrical impulses, and intercellular communication.* As a major structural component of neural membranes, Phosphatidyl Serine facilitates the activity of neurotransmitters involved in learning, memory, and mood.* Also known for its effect on brain function, Ginkgo biloba has demonstrated powerful antioxidant activity in scientific studies.* These properties make Phosphatidyl Serine & Ginkgo biloba an ideal supplement combination for cognitive support.

CAUTIONS/INTERACTIONS: Phosphatidyl Serine may interact with acetylcholinesterase inhibitors, cholinergic or anti-cholinergic medications. In addition, Ginkgo may interact with anticoagulants and antiplatelet medications, as well as a number of other pharmaceutical drugs. If you are taking any prescribed medications, please consult your healthcare practitioner before taking this product. For more information on this product go to www.protocolforlife.com/P2385.

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
