V1

SUGGESTED USAGE: As a dietary supplement, take 3 to 6 Vcaps® 3 times daily, preferably with food.

HOW IT WORKS: *Chlorella vulgaris*, a single-celled fresh water plant, is a storehouse of enzymes, vitamins, minerals, and phytonutrients. In addition, it contains high amounts of purifying chlorophyll, as well as the nucleotides RNA/DNA. Because *Chlorella* contains numerous nutrients, including antioxidants, it is thought to exert its antioxidative properties by scavenging free radicals created by various environmental factors.* This product is carefully produced using *Chlorella* that has been milled to break its glycolipoprotein cell wall for improved digestion and absorption.*

CAUTIONS/INTERACTIONS: *Chlorella* may theoretically interact with immunosuppressants. In addition, *Chlorella* is known to contain significant amounts of Vitamin K and therefore, may interact with warfarin. *Chlorella* can also contain iodine. *Chlorella* might cause an allergic reaction in people sensitive to iodine. If you are immunocompromised, taking immunosuppressant medications or warfarin, consult your healthcare practitioner before taking this product. For more information on this product go to www.protocolforlife.com/P2628.

This bottle contains an AGELESS® Oxygen Absorber packet to ensure freshness. Do not eat packet. Store in a cool, dry place. Please Recycle.
