SUGGESTED USAGE: As a dietary supplement, take 1 lozenge 1 to 4 times daily, or as directed by your healthcare practitioner. Allow lozenge to dissolve slowly and completely in mouth and swallow.

Keep refrigerated to maintain live bacteria counts.

HOW IT WORKS: E.N.T. Biotic™ is a probiotic lozenge containing the naturally occurring beneficial microorganism *Streptococcus salivarius* BLIS K12®. Non-clinical studies have demonstrated that *S. salivarius* can help to maintain balanced inflammatory responses and has been clinically shown to support oral and throat health.* Although it is not an antibiotic, E.N.T. Biotic™ BLIS K12® successfully colonizes the oral cavity at the expense of other bacteria, promoting oral health.* It also helps to reduce bad breath when used in conjunction with proper oral hygiene.* Fructooligosaccharides (FOS) provide nutritional support for *S. salivarius*.

CAUTIONS/INTERACTIONS: There are no known drug interactions. For more information on this product go to www.protocolforlife.com/P2921.

Formulated by doctors and clinical scientists exclusively for licensed healthcare practitioners.
