

SUGGESTED USAGE: As a dietary supplement, take 1 to 2 tablets 30 to 60 minutes before bedtime, or take as directed by your healthcare practitioner.

HOW IT WORKS: GI Guard™ PM is a nutritional formula with PepZin GI®, Melatonin, amino acids, and B Vitamins designed to help maintain the strength and integrity of the gastrointestinal mucosal barrier.* GI Guard™ PM features PepZin GI®, which has been shown in clinical studies to promote a healthy stomach lining and to support proper gut repair processes.* Melatonin, a potent free radical scavenger, known to exist at high levels in the gut, where it exerts its protective effects against oxidative stress throughout the gastrointestinal tract.* Melatonin also helps support healthy gastric pH levels, normal pepsin production in the stomach, and helps to regulate proper intestinal motility.* B Vitamins and Amino Acids, such as L-Tryptophan are necessary for Melatonin synthesis.*

CAUTIONS/INTERACTIONS: Do not drive or use machinery for 4 to 5 hours after taking melatonin. Theoretically, concomitant use of melatonin with alcohol, benzodiazepines, or other sedative drugs might cause additive sedation. Melatonin may interact with anti-coagulant/anti-platelet medications, antidepressants, anti-hypertensives, anti-diabetes drugs, anti-neoplastic agents and other drugs. If you are taking any prescription medications or if you have glaucoma, consult your healthcare practitioner before using this product.
